

MixedFLOW™ IMPELLERS

The king of mixing blades is designed to provide safe and efficient liquid mixing. The impeller embodies patented features obtainable in no other stirring device.

Features:

The flowing design of the blade pitch creates a self centering action

Forces solids off the bottom with minimum swirl and vortex

Thorough mixing with minimum addition of air

Creates consistent interaction of material

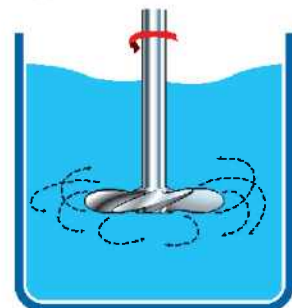

Ideal distribution of suspended material

MixedFLOW™ FLOW PATTERN

PROPELLER FLOW PATTERN

MixedFLOW™ Impellers are available in two (2) designs... low pitch and high pitch. As a rule, use low pitch for low to medium viscosity liquids and high pitch for medium to high viscosity liquids.
